

Flexible IT Solutions for your Business Needs

- Apogee Suite™ uses best-of-breed technologies such as Spring, Hibernate, Lucene, moden standards such as JSR-168, JSR-170, Web Services, Java Server Faces and contributions from our strong technology background to get higher quality software produced more quickly at much lower cost.
- Apogee Suite™ is in part build by a team with years of experience in software design and IT solutions, including the document imaging, and other topo level application that most enterprise customers expect from their IT solutions.
- Apogee Suite™ allows users to access a simple to use, Intelligent Virtual File System from their native applications or portals with the full power of an Enterprise Content Management System.

APOGEE SUITE™ WORKFLOW SOLUTIONS

WORKFLOW SOLUTIONS

Workflow is the way your business processes workloads, and who is responsible for that process all the way to the individual task and who should be assigned the task.

Every business is unique in that each has their own rules and business workflow. Apogee supports a truly customizable workflow.

APOGEE SUITE™ CONTENT MANAGEMENT SOLUTIONS

Web Content Management 2.0 is about a web content management platform that provides:

ENTERPRISE CONTENT MANAGEMENT (ECM)

What CMIS (Content Management Interoperability Services) Means to You?!

Apogee Suite™ is one of the first of the leading ECM products that has a common API which allows developers to write content management applications that run against all CMIS-compliant repositories.

Your data is now manageable.

Service Features and Benefits

With IT budgets squeezed, business are under higher levels of pressure and are being mandated into delivering more with fewer resources. Allow Tejas Technologies, Inc., to show you how your organization can focus on lowering cost, increasing simplicity and ensuring greater choice by examining the real costs of implementing ECM solutions with a true alternative to Microsoft SharePoint.

- Web Content Management
- Documents Management
- Records Management
- Image Management
- Content Repository
- Collaboration

Why Apogee?

- Reliability, "Apogee sets new industry standards for bulletproofness."
- Stability, with Apogee means it isn't necessary to upgrade for the sake of upgrading, putting the choice in the hands of the users rather than the suppliers is hard to criticize.
- Audit-ability, A benefit of Apogee software is its audit-ability. "We can easily see that Apogee software has a distinct advantage over other software systems, since it is possible to easily and quickly identify potential security problems and correct them."
- Cost, from a business perspective the purchase cost of software is only one factor; total cost of ownership (TCO) is what really matters. Other things being equal, the solution with lowest TCO is usually the most desirable one.
